MANUAL

TSP-120

Portable BT Speaker System

WARNING

1. DO NOT place objects on top of the device, as objects may scratch the device.

2. DO NOT expose the device to dirty or dusty environments.

3. DO NOT insert any foreign objects into the device.

4. DO NOT expose the device to strong magnetic or electric fields.

5. DO NOT use the device in the rain.

6. Please check with your Local Authority or retailer about the proper disposal of electronic products.

7. DO NOT disassemble the device. Only a certified service technician could perform a repair.

Warning: Lithium batteries inside

8. The device has apertures to disperse heat. DO NOT block the device ventilation, otherwise the device may become hot and malfunction as a result.

Illegal operations may cause personal injuries or fatal accidents. Illegal operations may cause damage to properties.

FEATURES OF THE MACHINE

This system can be used with personal computers, mobile phones, DVD, VCD, CD, LD, TV, MP3, radios, electronic pianos and any other devices that have audio output.

Amplifier circuits uses high-performance and high-fidelity design, coupled with professional high-quality speaker, in order to give the sound field a clear and distinct levels effect.

The sound system is outstanding. It has deep and powerful bass, strong treble effects and a clear, bright pitch.

The professional electronic frequency division circuit enhances the machine's crossover point effects.

Using high-capacity batteries of professional design and manufacture as well as the dedicated audio power capacitors, the speaker gets a larger and more stable power reserve margin with better dynamics and higher signal-to-noise ratio.

BUILT-IN BT FUNCTION

- Press "MODE" button to choose the input signal source as BT channel when starting the machine.
- Please ensure the BT devices you want to connect is on. Then scan and connect the speaker with the BT devices. When the connection is successful, "tick" tone will prompt. If the speaker can't be connected, please restart the speaker or the device and try again.
- After the mobile phone and the BT are successfully connected, you can play music. To ensure the continuous stability of the music signal, please try to keep the BT and the mobile phone facing one another.
- The distance between the BT devices and the machine can be up to 10 meters if there are no barriers.

FRONT PANEL FUNCTIONS

Electric and electronic equipment and included batteries contains materials, components and substances that can be hazardous to your health and the environment, if the waste material (discarded electric and electronic equipment and batteries) is not handled correctly.

Electric and electronic equipment and batteries is marked with the crossed out trash can symbol, seen above. This symbol signifies that electric and electronic equipment and batteries should not be disposed of with other household waste, but should be disposed of separately.

As the end user it is important that you submit your used batteries to the appropriate and designated facility. In this manner you make sure that the batteries are recycled in accordance with legislature and will not harm the environment.

All cities have established collection points, where electric and electronic

equipment and batteries can either be submitted free of charge at recycling stations and other collection sites, or be collected from the households. Additional information is available at the technical department of your city.

Hereby, Inter Sales A/S declares that the radio equipment type TSP-120 is in compliance with Directive 2014/53/EU. The full text of the EU declaration of conformity is available at the following internet address:

www.denver-electronics.com and then click the search ICON on topline of website. Write model number: TSP-120. Now enter product page, and RED directive is found under downloads/other downloads.

Operating Frequency Range: 87.5 – 108 MHz

Max Output Power: 10 W
